

I love XM Radio and am more than happy to pay for it each month. At first I was attracted to it because of the great variety of music and talk programs, but recently I have found that the around the clock local traffic and weather is invaluable! If that was all they offered I think I would buy it just for that. For my business I constantly drive around the Washington area, and having detailed traffic saves me so much time. I'm sure you all know how miserable the traffic is around here, so any advantage I have is desperately needed. Removing traffic and weather from XM Radio would be a horrible miscarriage of justice. There is no valid reason to prevent citizens of this country to listen to whatever they want - especially when we pay for it. Thus, you must reject NAB's Petition 04-160!!!

Sincerely,

Marc Regardie
